

## Corbett Hospital Building Works Update: The New Stourbridge Health & Social Care Centre

By August 2007, we will have demolished the old Corbett outpatients building and replaced it with a new Health and Social Care Centre. As a result, the layout and access to the Corbett site will be changing. You may find that routes that you previously used will be fenced off to allow demolition and construction to take place.

Work will soon begin on the demolition of the old outpatients building. If you are using the routes through and around Corbett, please look out for:

More traffic turning into and out of Corbett

Changes and restrictions to the routes through the Corbett site

Construction machinery working and moving around the site

Information and warning signs displayed around the perimeter of the site

The school crossing on Vicarage Road will still remain in the same position, but it is planned to place a second crossing at the construction site entrance - we will be working with the local school and neighbours to keep you up-to-date.

Mowlem would like to involve anyone who is interested in what we are doing and will be offering opportunities to visit the project. Look out for our next update in the Summer.

In the meantime, please be aware of the changes taking place and remember that **construction sites are dangerous places.**

# Revised pedestrian access to Corbett Hospital Area
